

CARETAG SYSTEM

The CARETAG System © is a new dynamic Workflow and Client Management System designed from ground up around the new legislative framework surrounding the disability and aged care industries. Utilising latest technology and programming methodologies, it's intuitive and provides a simple, user friendly environment for Administrators and Support Staff in the Community Care Industry.

One application to schedule all your Community Participation, ADE, and ADHC type services

Capture payroll and billing information in homes, in workshops, at activity centres and at remote locations

Access system from anywhere anytime

Automatically manage complex service conditions

Mobility

Utilising the latest in mobile technology, the CARETAG System is as simple to use as a credit card. Automatically delivers schedules to Support Workers in the field, you can generate case notes through any device and allows service coordinator access to the rostering system through any mobile device.

- Three different options for mobile data capturing
- Multi-layer client validations
- Secure and Tamper proof
- Extremely easy to use, minimal training required
- View and create rosters from anywhere anytime
- Operates independently of main scheduling system
- Capture Client, Staff, and Contractor information
- Capture data anywhere anytime – ***no mobile reception required***
- Participant feedback feature

NDIS & My Aged Care Ready

With the introduction of the NDIS and My Aged Care, a higher level of accountability is required to meet the new legislative framework set around NDIS, ADHC and CDC type services. To remain competitive in what has become a more commercially defined industry, you need to streamline your operation and improve efficiency. The CARETAG System is ready for work.

- NDIA Price Guide configurator
- Multi-layer client validations
- Participant Case Notes Generator
- Participant Plan Configurator
- Create your own custom services
- Generates NDIA ready reports
- Customise service pricing
- Manage ADHC, CDC and ADE services through one system
- Capture last minute changes as well as unscheduled services

The CARETAG System is designed to deliver fast and accurate Payroll and Billing information under any condition such as when there is no phone reception, when schedules are changed or when incidental service conditions occur. The inbuilt client validation process ensures that all the billing information is approved and the Support Staff have been validated by the client before submitting for processing.

- Management approval feature
- Multi-layer client validations
- Comprehensive details in billing & payroll report
- Generates NDIA ready reports
- Pick up all services and pricing
- Client Validation and approval feature
- Manage ADHC, CDC and ADE services through one system
