# Hakomi Australia Association

## Website Redesign

## Specifications

Build and design a new website using an off-the-shelf, well-regarded web content management system, extendable with standard plug-ins (or built-in template options) to provide the following features:

1. Content and menu:
   a) Home page (static page with intro to HAA Website)
   b) About [HAA] (static page)
   c) Hakomi (static page)
   d) Membership (form page, with sign in for existing members, and application form for prospective members)
   e) FAQ (static page with expandable content for each question)
   f) Blog (dynamic content showing latest blogs)
   g) Find a therapist (static page)
   h) Events (page linking to Hakomi Pacifica events' page)
   i) Links (static page)
   j) Contact us (static page, form)

2. Side bar includes:
   a) sign up to email list (to receive blog post updates)
   b) tag cloud
   c) blog categories & latest
   d) blog search function

3. Secure Members Section
   a) For members only
   b) Accessed by sign-in
   c) Initially will contain static pages for members' news and Regional Round-Ups, Q&A, and members' blog
   d) Application to be a member is open to the public, but requires payment and admin approval. Completed application must be automatically sent to an authorised approver.

4. Automatic email notification
   a) to public mail list for each new blog
   b) to members only about any updates/additions to members section

5. Social media sharing on every page/blog post

6. 3 designs to be presented for review. Logo and colour directions provided.

7. The final build can be managed and maintained by non-developers
